

Prospective Referring Provider

30-40 Million Undiagnosed OSA Patients

Prospective Referring Provider

Prospective Referring Provider

A Complete Solution for All of Your Obstructive Sleep Apnea (OSA) Patients

ProAct's mission is to identify and successfully treat undiagnosed OSA patients and to provide a treatment alternative for the many that are not compliant with prior treatment efforts.

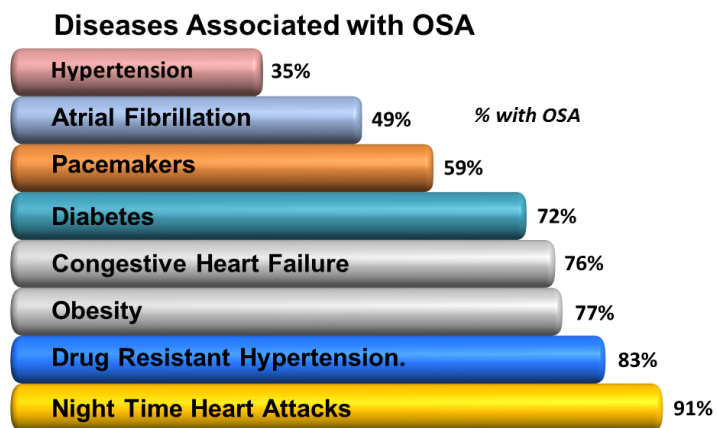

Due to its clinically proven [comorbidities](#), OSA is one of the most devastating diseases currently faced by the medical community. Only 15% of OSA patients have been diagnosed and treated; and of those, treatment has failed over 50% of the time due to noncompliance. Today, there are over 30 million undiagnosed OSA patients in need of care.

85% of those with OSA are Undiagnosed.

97% of the Current Treatment Fails Over 50% of the Time.

The average incidence of OSA in adults is 15-20%, but in practices treating these comorbid diseases, the incidence is far greater.

If you are treating patients with one or more of these [comorbid diseases](#), identifying those patients with OSA and arranging for the treatment of their OSA will dramatically improve their health and well-being and may also have a significant positive impact on the primary diagnosis outcome.

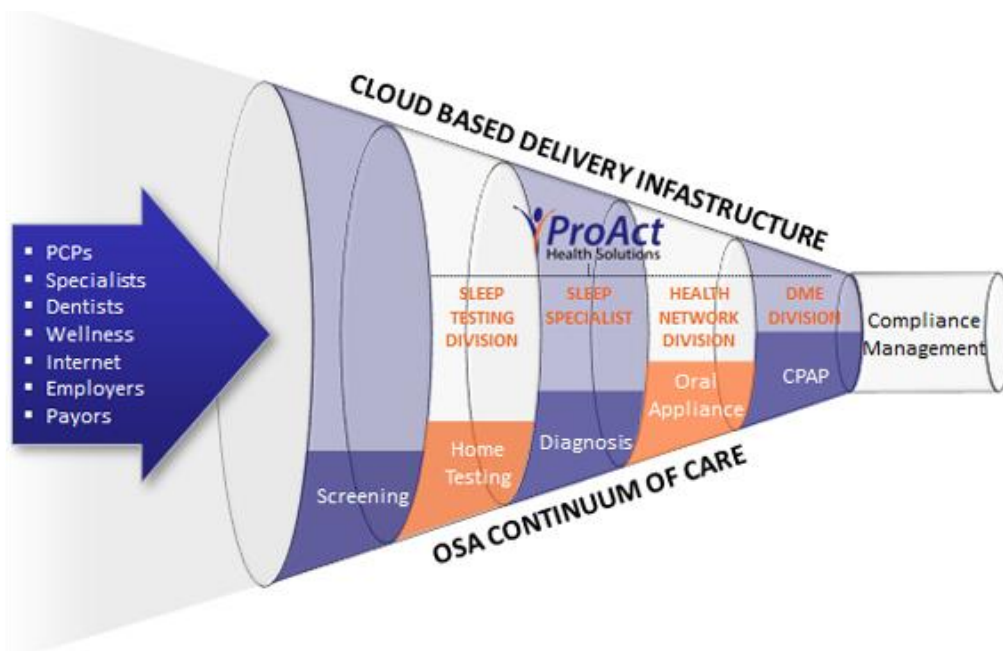

Protocol Driven

ProAct brings a next generation disease management platform to this fragmented environment, managing the full continuum of OSA care to deliver a high value proposition to patients, medical providers and payors. ProAct delivers the "full continuum" of care for OSA using the cloud-based iSync™ platform that creates a virtual delivery infrastructure linking all providers delivering services. [The iSync™ System](#) maximizes interdisciplinary communication, protocol driven care, and outcomes orientation.

By linking ProAct's Testing and Diagnosis Division, DME Division, and our Provider Health Network Division with providers interested a total solution for their OSA patients, the system enables any Dentist, PCP, ENT, Bariatric physician, Cardiologist, or any other specialist to manage 100% of their OSA patients through the total continuum of care: screening, testing, diagnosis, treatment, and ongoing patient management.

A Virtual Delivery Infrastructure

The [iSync™ System](#) represents the future of people/patient management with innovative clinical protocols, process flows, integrated patient care, and sophisticated and automated patient communications. The platform empowers providers and consumers to leverage information gathered from healthcare apps to better manage the disease, improving the outcomes and quality of care, while reducing costs.

Use of the iSync™ System is Critical to Success

To successfully challenge the epidemic of undiagnosed OSA, providers must screen the patient populations under their influence to identify those in need of care. The iSync™ System starts with a convenient and effective tool for assessing patients and entering patient data into the medical record, the first step in the continuum of care. ProAct offers an exceptional, no cost screening tool to participating physicians; the Assessment can be completed in less than five (5) minutes in the waiting room, digitally scored, and made available for you to eScript Home Sleep Testing and Diagnosis or treatment through the ProAct Provider Health Network.

Linking you to the treating providers

The iSync™ System is designed to:

- Meet the complex day-to-day needs of the ProAct Provider Health Network dentist to deliver care rendered in a *dental office* within *medical insurance reimbursement parameters*;
- Meet the needs of the referring physician to easily screen and refer patients, *while continuing to stay in the management loop during treatment*; and
- Link all participants to maximize the continuity of care and treatment outcomes.
